SUMMARY

Full Stack Developer proficient in Python, SQL, and modern web frameworks. Experienced in designing APIs, managing relational databases, and deploying data-driven web applications. Focused on building scalable backend systems and clean, maintainable code that integrates seamlessly with dynamic frontends.

EXPERIENCE

Cube Green Energy

Oct 2024 – Present

Data analyst under 1 year internship contract

Hyderabad

- Developed data applications using **Plotly Dash**, **Flask**, and **PostgreSQL**, integrating RESTful APIs and improving data accessibility for energy analytics teams.
- Optimized SQL queries and database schemas, reducing query latency by **30%**.
- Implemented backend ETL scripts in Python for ingestion and transformation of large renewable energy datasets.
- Created multilingual text-processing module using NLP for German and French reports to enhance automation.

MaticAlgos

Jan 2024 – Mar 2024

Python Developer Intern

Pune

- Built and deployed **FastAPI-based microservices** for backtesting trading algorithms on historical OHLCV data.
- Integrated Python scripts for **data cleaning, feature engineering, and analytics pipelines**.
- Enhanced API performance and modularized endpoints to support scalability for future deployment.

PROJECTS

Multi-Hierarchy Task Tracker | Python, Dash, MongoDB, CSS, JavaScript

2024

- Built a task management system supporting multi-level hierarchies, improving task organization efficiency by **30%** for simulated user workflows.
- Enhanced front-end usability with custom CSS and JS Dash components, reducing task navigation time by **25%**.
- Optimized MongoDB schema to handle nested tasks, ensuring **fast retrieval and updates** even for complex hierarchies.

WhatsApp Chat Analysis | Python, Streamlit, Pandas, NLP

2024

- Built a web app to analyze WhatsApp chats, providing insights into user engagement and conversation trends, improving **decision-making for social interactions by 20%**.
- Applied NLP and data preprocessing to extract sentiment, keyword frequency, and activity patterns.
- Interactive dashboards using Streamlit enabled users to explore chat analytics easily and intuitively.

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS, JavaScript

Frameworks: Flask, Django, FastAPI, Plotly Dash, Streamlit, Bootstrap

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, Postman, VS Code, Jupyter Notebook

Concepts: FAST APIs, CRUD operations, Database Design, ETL, Authentication, CI/CD

EDUCATION

AISSMS IOIT, Pune

2020 – 2024

B.E. in Artificial Intelligence and Data Science

CGPA: 8.8

YCIS, Satara

2018 – 2020

HSC (Science)

70%

NESS, Satara

2017 – 2018

SSC

94.4%

CERTIFICATIONS

Full Stack Web Development with Python (Technogeeks)

2024

Trained in Flask, Django, SQL, and deployment workflows (Heroku)

AWS Cloud Practitioner Essentials

2024

Fundamentals of AWS architecture, services, and deployment models

HackerRank Certifications

2024

5-star Gold Badge in Problem Solving; Certifications in Python, SQL
